VERSATILE S and R, with the FLAT and OUT diffuser, consists of 2 interchangeable models and diffusers for just one versatile concept, as its name indicates. Either recessed (R), surface mounted or suspended (S), with the same design and with only the variation of a tiny frame for the recessed one, they all equally adapt to 2 diffusers that achieve very different looks, that can be both discrete (FLAT) or much more visual (OUT). The VERSATILE system achieves functionality and at the same time is practical, easy to install, and can be part of many day-to-day projects.
