360 Collection

PROJECT: BICI LAB ANDORRA

360 Collection

Introducing the 360 COLLECTION, powered by LED technology, offering unparalleled possibilities for illuminating spaces previously out of reach. With its versatile applications indoors and outdoors, unaffected by the Sun's ultraviolet rays, its potential uses are endless. What sets the 360 COLLECTION apart from other market technologies are its exceptional features:

- Four tubes/profiles of varying diameters crafted from Lupolen 2426H (polyethylene).
- 360-degree shadow-free lighting in two profiles.
- Customizable curves to fit any design requirement.
- Multiple color options.
- A wide range of forms and shapes.
- The ability to create luminaires that match each designer's imagination.

These outstanding qualities make the 360 COLLECTION the epitome of versatility, flexibility, and originality. It enables the creation of diverse projects, offering solutions that cater to the needs of customers in various spaces such as homes, stores, offices, hotels, shopping centers, cinemas, businesses, and buildings. Just imagine!

Our latest advancement in the 360 COLLECTION introduces a series of semi-standardized pieces that allows designers to configure their unique designs. By combining standard straight and curved elements, designers can create original and versatile compositions using either polyethylene or metallic parts that adapt seamlessly to different diameters. This evolution opens new possibilities for creative expression and customization, elevating the 360 COLLECTION to even greater heights.

Presentamos la colección 360, impulsada por la tecnología LED, que ofrece posibilidades inigualables para iluminar espacios que antes estaban fuera de alcance. Con sus aplicaciones versátiles tanto en interiores como en exteriores, sin verse afectada por los rayos ultravioleta del sol, sus posibilidades de uso son infinitas. Lo que distingue a la colección 360 de otras tecnologías del mercado son sus características excepcionales:

- Cuatro tubos/perfiles de diferentes diámetros fabricados con Lupolen 2426H (polietileno).
- Iluminación de 360 grados sin sombras en dos perfiles.
- Curvas personalizables para adaptarse a cualquier requisito de diseño.
- Múltiples opciones de color.
- Una amplia variedad de formas y figuras. La capacidad de crear luminarias que se ajusten a la imaginación de cada diseñador.

Estas cualidades sobresalientes convierten a la colección 360 en el epítome de la versatilidad, la flexibilidad y la originalidad. Permiten la creación de proyectos diversos, ofreciendo soluciones que satisfacen las necesidades de los clientes en diferentes espacios como hogares, tiendas, oficinas, hoteles, centros comerciales, cines, negocios y edificios. ¡Simplemente, imagínatelo!

Nuestro último avance en la colección 360 presenta una serie de piezas semiestandarizadas que permiten a los diseñadores configurar sus diseños únicos. Al combinar elementos estándar rectos y curvos, los diseñadores pueden crear composiciones originales y versátiles utilizando tanto partes de polietileno como metálicas que se adaptan perfectamente a diferentes diámetros. Esta evolución abre nuevas posibilidades para la expresión creativa y la personalización, elevando la colección 360 a cotas aún mayores.
