360 Collection

PROJECT: BICI LAB ANDORRA

360 Collection

Introducing the 360 COLLECTION, powered by LED technology, offering unparalleled possibilities for illuminating spaces previously out of reach. With its versatile applications indoors and outdoors, unaffected by the Sun's ultraviolet rays, its potential uses are endless. What sets the 360 COLLECTION apart from other market technologies are its exceptional features:

- Four tubes/profiles of varying diameters crafted from Lupolen 2426H (polyethylene).
- 360-degree shadow-free lighting in two profiles.
- Customizable curves to fit any design requirement.
- Multiple color options.
- A wide range of forms and shapes.
- The ability to create luminaires that match each designer's imagination.

These outstanding qualities make the 360 COLLECTION the epitome of versatility, flexibility, and originality. It enables the creation of diverse projects, offering solutions that cater to the needs of customers in various spaces such as homes, stores, offices, hotels, shopping centers, cinemas, businesses, and buildings. Just imagine!

Our latest advancement in the 360 COLLECTION introduces a series of semi-standardized pieces that allows designers to configure their unique designs. By combining standard straight and curved elements, designers can create original and versatile compositions using either polyethylene or metallic parts that adapt seamlessly to different diameters. This evolution opens new possibilities for creative expression and customization, elevating the 360 COLLECTION to even greater heights.

Présentation de la collection 360, alimentée par la technologie LED, offrant des possibilités inégalées pour l'éclairage des espaces qui étaient auparavant hors de portée. Grâce à ses applications polyvalentes en intérieur et en extérieur, non affectées par les rayons ultraviolets du soleil, les utilisations potentielles sont infinies. Ce qui distingue la collection 360 des autres technologies du marché, ce sont ses caractéristiques exceptionnelles:

- Quatre tubes/profils de différents diamètres fabriqués à partir de Lupolen 2426H (polyéthylène).
- Éclairage à 360 degrés sans ombre dans deux profils.
- Courbes personnalisables pour s'adapter à toutes les exigences de conception.
- Options de couleurs multiples.
- Une large gamme de formes et de styles.
- La capacité de créer des luminaires qui correspondent à l'imagination de chaque designer.

Ces qualités exceptionnelles font de la collection 360 l'incarnation de la polyvalence, de la flexibilité et de l'originalité. Elle permet la création de projets divers, offrant des solutions qui répondent aux besoins des clients dans différents espaces tels que la maison, les magasins, les bureaux, les hôtels, les centres commerciaux, les cinémas, les entreprises et les bâtiments. Imaginez simplement!

Notre dernier développement dans la collection 360 présente une série de pièces semi-standardisées qui permettent aux designers de configurer leurs propres designs uniques. En combinant des éléments droits et courbes standard, les designers peuvent créer des compositions originales et polyvalentes en utilisant soit des pièces en polyéthylène, soit des pièces métalliques s'adaptant parfaitement à différents diamètres. Cette évolution ouvre de nouvelles possibilités d'expression créative et de personnalisation, ce qui permet à la collection 360 d'atteindre des sommets encore plus élevés.
