

Its name *conceals* its body. The Abscondere Slim is the profile that you'll never see. It allows for a beautiful indirect light, soft and warm, a backing light with a design that will enable you to finish up the ceiling in a smooth, elegant, and almost invisible way. This gives the project a quality flair, rather like a luxury item. ABSCONDERE SLIM dignifies and adds up to your construction quality. Its NON-presence is its best quality; which is equivalent to say that its quality doesn't go unnoticed.
